

## Press Release

See Calibre at Integrated Systems Europe 2012, Stand 3B104

# Calibre UK partners with Optoma Europe at ISE 2012

*Award-winning image processing specialist Calibre UK provides image processing technology to support Optoma Europe's ProAV projector launch*

Bradford, UK, 31 January 2012 – As Optoma Europe are focusing on creating products designed for the ProAV technology marketplace, the ability of Calibre UK's HQView image processors to showcase projector edge blending and warping at the highest possible image quality will be highlighted.

A focal point on the Optoma Europe stand will be a stunning six meter wide curved two-channel display that blends two bright ProScene EH7500 WUXGA resolution DLP® projectors.

Calibre UK are specialists in image processing technology and work in a variety of ProAV markets from digital signage, corporate, education, medical, museums and visitor attractions to live events. Calibre's HQView320, 420 and 520 image scalars offer warping and blending of multiple images from a huge range of possible sources, both analogue and digital.

Explaining the exhibition activity between the two companies, Tim Brooksbank, Chairman at Calibre UK says: "Optoma are consistently impressing us with their dedication to provide their ProAV customers increased accessibility to high-specification, reliable and innovative technology. We're delighted to be helping to show Optoma Europe's new innovations to their best at ISE 2012."

Bob Johnson, Product Manager at Optoma Europe says: "The increased focus of our stand towards high-specification ProAV products combined with the launch of our new ProSceneEH7500 projector will change the way in which people see our technology. Having some of the industry's most image processing equipment to process images is where Calibre UK comes in."

ProScene EH7500 is supported by the Optoma ProScene certified partner programme.

ENDS

### **About Calibre UK**

Calibre UK is highly respected worldwide as a specialist manufacturer of image processing technology with 24 years (1988-2012) of experience. Calibre continues to evolve its product range and make further technical advances in the broadcast, ProAV, aerospace, defence, medical and industrial markets through the innovative use of modern technology. Utilizing its own in-house hardware and software design teams for all product development including OEM programmes.
