

Press Release

All-in-One LED Display has received the ISE 2019 Best of Show Award. Calibre, a subsidiary of Coretronic Group, gains global recognition in its embedded solutions and innovation

ISE 2019 Best of Show Awards for the QUAD series All-in-One LED Display

Bradford, Yorkshire, UK, February, 2019 – Coretronic’s subsidiary company Optoma has completed its European show in Amsterdam at Integrated Systems Europe 2019. Its first launch of QUAD series all-in-one LED display has won the Best of Show Awards. This product is extremely light and easy to assemble compared to a standard typical LED videowall and is embedded with the 4K LEDView Scaling solution designed by Calibre, another subsidiary of Coretronic Group. Integrated Systems Europe is one of the world’s largest exhibitions for AV and systems integration, showcasing the most advanced integration technologies, the award shows Coretronic Group’s global recognition on its Technical integration and Innovation.

Optoma FHD130 QUAD Series LED display has adopted Calibre's proprietary HQUltra image scaling technology, the 4K scaler-switcher is embedded making the QUAD an integrated all-in-one LED display. Calibre's image processing technology provides best in class picture quality, enable switching between different inputs in around 0.5 seconds, comparing with similar products in the industry with 2 to 3 seconds. Its low latency video processing is also an essential in live performance to avoid lip-sync effect. Calibre's scaler-switchers are perfect for demanding applications including professional AV, events, staging, broadcast, conference, houses of worship, corporate AV and education etc.

The technology integration between Coretronic and Calibre utilizes the advantage of LED display, adding its best in class scaling, switching and image processing technology into their partner's LED display product. Based on high-end technology, we will be serving in more applications and provide our customers with more value together, and achieve a win-win situation. Coretronic group will continue to expand into the large screen display and ProAV market to present the best quality of image to all our global clients.

About Calibre

Multi-award winning British company, Calibre is a pioneer in the image processing technology. Over the past 30 years, it has achieved world recognition with Queen's Award for Enterprise and was one of designated brands for video processing in Olympic Games. Calibre is market leader with innovation, providing image scaling and processing technology for use in broadcast/television, large venue projection and LED videowalls etc. Calibre became part of the Coretronic Corporation in August 2017, which is a milestone in the global chain of Coretronic Group. Coretronic will continue expanding its international market, absorbing talents, innovating in technology and providing customer with more value.
