LEDView530 Provides Essential Support for Showstate

Bradford, Yorkshire, UK, February 15, 2019 – Following their recent investment in PL2.5 LED tiles, ShowState an Event technology solutions based in Berkshire has the need to create an out of the box solution that would cover a number of situations encountered by their team. ShowState have used the LED tiles a number of times as a replacement for a projector or where there is a lot of ambient light, or there isn't enough space in the room for rear projection. In addition they were finding a growing number of clients wanting to update their content at the last minute and expect it to be managed.

“For these reasons the Calibre LEDView530 has become an essential part of our LED tile control rack. It allows us to quickly fit content to the screen regardless of any video equipment upstream. Intuitive access to output window size has been the most used feature so far” Said Josh Nash, Technical Manager for ShowState.

“Being able to attach multiple units to a wireless router and adjust has been particularly useful for doing colour adjustments whilst keeping the scalars near to our LED controllers.” He continued

Mr. Willy Tsai Managing Director for Calibre commented “Calibre has a long standing reputation for providing the very best solution and service and the LEDView530 shows the continued commitment to these very high Standards”
