

Press Release

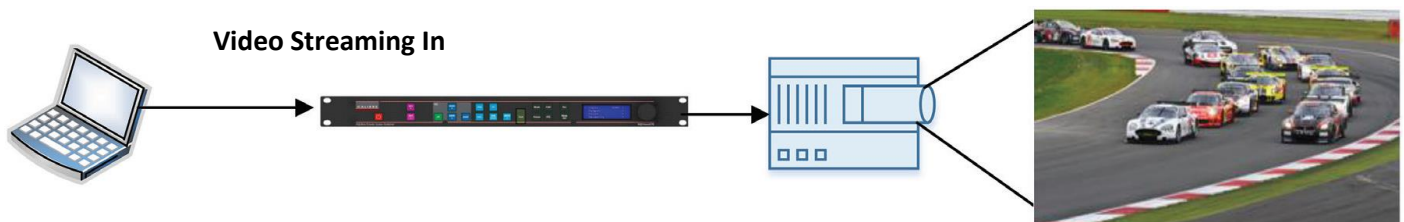

Streaming Video Input now standard for all 4K Processors

Bradford, Yorkshire, UK, October 9, 2018 – Calibre UK Ltd a subsidiary of the Coretronic Corporation of Taiwan has announced that from the 1st October all current Calibre 4K Processors will receive the H.264 Streaming video Input at no extra cost.

Previously an optional extra, the Streaming Video Input enables direct ingest of HD H.264 content via gigabit Ethernet port, as well as this port remaining available for webserver and remote control API use. The streaming video input is selected by an additional input select key on the front panel, so once the scaler-switcher has been installed and configured the user can select the streaming video input channel as the source to be displayed and switched to just as easily as if it was a HDMI or DVI input.

Mr. Willy Tsai Executive Vice President for Calibre commented “The Calibre 4K Processor range has a product for just about every budget and making the Streaming Video input standard across all models provides customers with extra capability without increasing costs”

新闻报道

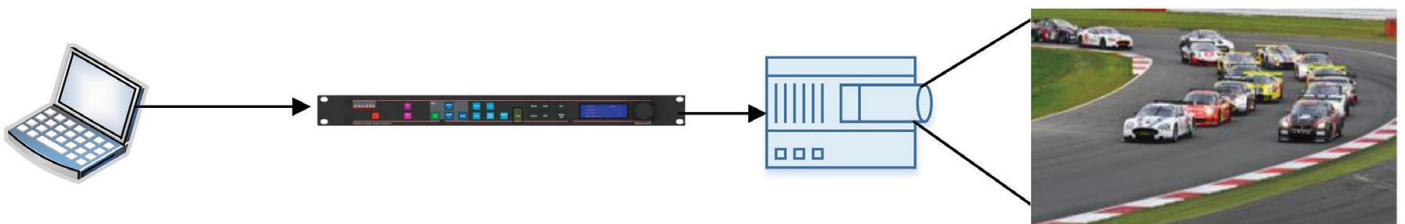

Calibre 处理器如虎添翼，流媒体输入成为 4K 系列标准设置

2018 年 9 月 28 日，英国约克郡，布莱德福德 – 台湾中强光电集团子公司 Calibre UK Ltd 宣布，自今年 10 月 1 日起，全部 4K 系列视频处理器将添加 H.264 Streaming video 流媒体输入，并无偿将此功能奉献给所有客户。

该功能此前一直受到客户青睐，但却作为额外收费选项。流媒体输入可使设备通过局域网端口直接接受 HD H.264 视频内容，与此同时，用户可通过设备内置网络服务器或 API 进行远程操控。流媒体输入作为一个单独的输入键将出现在设备前端面板上，使用起来也相当方便，当设置完成后，流媒体输入就像普通的 HDMI 和 DVI 输入一样切换自如。

Calibre 执行副总裁 Willy Tsai 表示“我们将流媒体输出作为标准设置添加到 Calibre 4K 系列的全部型号中，希望借此为我们的客户无偿带来更多附加值。”
