

DisplayMaster

Computer Video Distribution Amplifier

DisplayMaster is the special purpose computer video distributor which forms the backbone of the Calibre MasterClass system. As well as being used with MasterClass, DisplayMaster can also be used as a “VGA hub” providing a high-quality yet cost-effective solution to run multiple displays from one source. DisplayMaster comes in four-way and eight-way variants and can be daisy-chained to allow nodes to be easily expanded up to a maximum of 128 displays from a single source.

DisplayMaster is a compact, cost effective, simple to install and use unit which maintains excellent image quality on all screens and comfortably handles resolutions up to 1600x1200.

DisplayMaster can drive signals to screens up to 30 metres away, further for lower resolutions, so copes easily with display systems large or small.

DisplayMaster is also ideal for simply driving extra monitors in public information systems, on exhibition stands and for simple presentation purposes such as in a boardroom or in a meeting room.

- DM4** 1 to 4 computer video distributor with external 220-240VAC PSU.
- DM8** 1 to 8 computer video distribution with external 220-240VAC PSU.
